Vice-Chairman - Alderman L.C.OLD

Alderman L.C.OLD in place of Alderman Mrs. D.M.MAIN

Councillors Sir W. AGNEW and A.H.DIBLEY  
in place of

Councillors L.C.OLD (elected Alderman) and L. de C.TURNER

SECTION A

INTRODUCTION and GENERAL COMMENTS

To The Mayor, Aldermen and Councillors of the Borough of Gosport.

Mr. Mayor, Ladies and Gentlemen,

1. I have the honour to present to you this ANNUAL REPORT FOR 1954. It refers to, and records, the work carried out under the administrative direction of Dr. G.V.Fleming who retired in February 1955 when I succeeded him.
2. This opportunity is taken to express my APPRECIATION to DR. FLEMING for the courteous assistance given to me in the transfer.
3. The GENERAL PRESENTATION of this Report has followed the model of those of previous years. Certain alterations and additions have been made to assist in the use of the publication as reference to our services. The Index at the end will explain the new arrangement.
4. Gosport is growing rapidly in many ways as can be noted from a study of the General Statistics. TABLE 3 records this GROWTH of POPULATION from 35,000 in 1921 to over 60,000 in 1954.
5. TABLE 3 also records that nearly 3,000 of the inhabitants are over 70 years of age. This problem of OLD AGE and the care of these OLD PEOPLE is increasing year by year as the proportion to the total population increases. There are about 20,000 young persons under 20 years of age so that some 23,000 inhabitants are mainly dependent on the efforts of the remaining 40,000. A large proportion of these are women who are not out at work. The situation is that more elderly people are in need of assistance in some form or other than before and in proportion there are fewer potential sources of contribution to the public purse to provide the necessary financial help.
6. From TABLE 4 it is noted that Gosport has a comparatively high BIRTH RATE.
7. TABLE 8 shows that Gosport is a healthy town judged by the DEATH RATE which is persistently much lower than that for England and Wales as a whole.
8. THE INFANT MORTALITY RATE, although not as good as for the whole country, is reasonably satisfactory.
9. TABLE 11 is of special interest in showing the changes which have taken place in our "HEALTH PICTURE" in the past 40 years. The comparison clearly shows that the Death Rate has fallen by over 30%, and that there has been a spectacular saving of lives of infants and young persons.
10. TABLE 12 deals with INFECTIOUS DISEASES. A comparison between 1954 and 1953 is made to assist you in your appreciation of the situation. The outstanding features are the marked drop in most of the notifications and the rise in deaths from notifiable Pneumonias.
11. Much interest has been demonstrated by you as a committee and the public of Gosport in DIPHTHERIA IMMUNISATION. The records of the situation have been set out in TABLES 14, 15 and 16. Whooping Cough protection has only been added to the official scheme in 1955 and there are no returns for any such immunisations which have been carried out by the family doctors.
12. TABLE 16 is a comprehensive survey of the STATE of PROTECTION AGAINST DIPHTHERIA among children of all ages up to school leaving age. This type of table is generally referred to as a "ladder". It records year by year, the numbers of children immunised in each age group. To appreciate the table it must be remembered that we have a natural increase of population by births over infant

deaths of about 1,000 children per year. Our aim is to have every baby immunised well before the first birthday with a full primary course and every child given a single booster or reinforcing dose at about school entry age. We are not reaching anywhere near our target. In 1954, dealing with primary courses, the protection was given to 57 babies born during that year and 537 babies born in 1953, the previous year. This is only about half of the potential number. Going a little further back to investigate a school entry age it is noted that in 1954, dealing with booster doses only, protection was given to 321 children born in 1949. This is less than one third of the potential approximate 1,000 children. At no stage is the picture reasonably safe. For safety for the community at large no less than 70% of children in any age group at any given time should be protected by immunisation as prescribed in the scheme. For absolute safety however, every child should be so protected.

13. TABLE 14 records Immunisation activity COMPARISONS WITH OTHER AREAS in the County. We are neither top nor bottom. Fareham and Winchester for example show much more successful interest in this problem, but we are more active than the average for the County.

14. TABLE 17 deals with VACCINATION AGAINST SMALLPOX. Our main concern is Primary Vaccination in Infancy and here Gosport is above the average for the Urban Areas of the County and the County itself.

15. TUBERCULOSIS is dealt with in Tables 18, 19 and 20.

16. TABLE 18 deals with the TUBERCULOSIS REGISTER. As each new case is notified it gets added to the Register. The natural tendency is for the numbers thereon to increase year by year.

17. TABLE 19 gives greater details of AGE and SEX DISTRIBUTION of incidence and deaths. The 48 Notifications of Pulmonary Tuberculosis and 8 of Non-Pulmonary Tuberculosis are marked improvements on previous years. The year shows little change in the number of deaths.

18. TABLE 21 deals with NOTIFICATIONS of PULMONARY TUBERCULOSIS from 1949 for several areas worked out to the Rate per 1,000 population. Gosport for 1954 has a higher incidence rate than the County as a whole or the larger Western Area of the South West Metropolitan Regional Hospital Board which includes Hampshire, Dorset and Wiltshire. It's rate is however better than Portsmouth, Southampton or Bournemouth. Looking back over this period Gosport has persistently had a higher incidence rate than the County or the Western Area. Bournemouth has always, with this 1954 exception, shown a much healthier record than our own. There has been no consistent superiority or inferiority in respect of Portsmouth or Southampton in these earlier years where the results have gone up and down.

19. TABLE 20 deals with the TUBERCULOSIS (ALL FORMS) DEATH RATE. Gosport has been persistently better than England and Wales as a whole since 1949. The Rate for the town has been as high as 0.99 in 1944, a War Year. Prior to 1939 it varied between 0.75 in 1934 to 0.50 in 1938. The table shows the unmistakable trend in improvement in the past few years. It has been reported elsewhere that Gosport is a "black spot" for Tuberculosis. This sweeping statement has no support in the facts as disclosed in Tables 20 and 21, nor is there any evidence of excessive incidence of, or mortality from, Tuberculosis in any particular occupation in the area.

20. SECTION D records the "SANITARY CIRCUMSTANCES of the AREA." There is very little in that section which needs any special comment. The Sanitary Inspectors have carried out considerably more inspections in 1954 than previously and very much more "repair" or abatement work was carried out following informal and formal representations.

21. SECTION E deals with "HOUSING". Again the records show greater activity by the Sanitary Inspectors in their visits made and greater success in the results of their approaches.

22. SECTION F deals with the CONTROL OVER FOOD. Fewer samples were taken than in 1953. In my opinion it is necessary to carry out a comparatively high rate of sampling in order to maintain a safe level in respect of food as offered and sold to the public.

23. SECTION G Lists and briefly reviews some of the more important General HEALTH SERVICES in the area. These are mainly provided through the County Council. The information has been set out to serve as a reference.

24. I would like to conclude this introduction to my first Annual Report to you on a PERSONAL NOTE. The way in which you, and Gosport, have accepted me, and my family, into your activities and life has been much appreciated. We feel completely at home.

25. In conclusion it is a pleasure to record the great help which the staff has given to me in my task of taking over this department and in preparing this Report.

I have the honour to be, Sir, Ladies and Gentlemen,

Your obedient Servant.

Gerward V. Pritchard

Medical Officer of Health.

## SECTION B

GENERAL STATISTICSTable 1 GEOGRAPHICAL INFORMATION

The Borough of Gosport covers an area of 6,185 acres.

It is peninsular, being bounded on the land side to the north-west by Fareham U.D.C. and by the sea - the Solent (on the south-west from the western extremity of Lee-on-Solent past Stokes Bay and Browdown to Fort Gilkicker and on the south-east from Fort Gilkicker to Fort Blockhouse at the entrance to Portsmouth Harbour) and Portsmouth Harbour (on the north-east).

Its greatest length, east to west or south-east to north-west, is about  $4\frac{1}{2}$  miles.

Its greatest breadth, north-east to south-west, is about  $3\frac{1}{4}$  miles.

Table 2 GENERAL INFORMATION

Estimated Mid-Year Home Population.....62,520 (decrease 430)

Number of Inhabited Houses (end of 1954 according to Rate Books).....15,594  
(apparent decrease 1,428 due to new analysis of all properties by the Rates Department)

Rateable Value.....£481,826 (increase £68)

Estimated Product of Penny Rate (Financial Year 1954/55).....£1,945 (increase £15)

SECTION D

SANITARY CIRCUMSTANCES of the AREA

Table 22

WATER.

The main supply is a typical chalk water remaining practically constant in quality, neutral in reaction and free from deposit on standing. It has no plumbo-solvent action. It is hard in character but is much softened on boiling. The water is chlorinated before it reaches the mains.

The supply has been satisfactory in quality and quantity.

The following table shows the number of samples taken during the year and the results of analysis were all satisfactory:-

	<u>Chem.Exam</u>	<u>Bact.Exam</u>	<u>Total</u>
Water from Public Supply Mains	4	30	34
Water before chlorination	3	7	10

No action in respect of any form of contamination was required during the year. So far as it is known all except two of the dwelling houses in the borough have direct main supplies.

Table 23

DRAINAGE and SEWERAGE

No additional lengths of sewers were laid in the borough during the year.

Table 24

RIVERS and STREAMS

There was no pollution in the area requiring any action.

Table 25      CLOSET ACCOMMODATION

There were no conversions of pail closets to water closets during the year.

Number of water closets	18,162
Number of pail closets	25

Table 26      PUBLIC CLEANSING

Household refuse is collected once weekly by the Corporation.  
Emptying of cesspools is carried out by Hants Cleansing Service under contract.

CAMPING SITES

The only camping site in the Borough is that at Stokes Bay owned and administered by the Council. Regular inspections were made. Conditions were found to be satisfactory.

Table 33      SMOKE ABATEMENT

There is no serious smoke problem in the Borough. Four complaints of nuisance were received during the year and no formal action was necessary to secure abatement.

Table 34      SWIMMING BATHS and POOLS

The Gosport Bath is equipped with an efficient filtration and chlorination plant. Regular inspections and tests were made. Conditions were found to be satisfactory.

The Paddling Pool at Lee-on-the-Solent is filled from a fresh water spring. Regular visits were made during the summer and advice given when necessary.

The Swimming pool at Lee-on-the-Solent is filled at convenient tides from the sea. Visits were made during the summer months.

Table 35      DISINFESTATION

Fourteen premises were disinfested for Bugs, Lice Fleas or Flies during the year.

Table 36      RODENT CONTROL - General

One man was employed whole-time on rodent control throughout the year. In addition casual labour was employed when required on sewer treatment for lifting of manhole covers etc.

The following work was done during the year:-

Private Dwellings Inspected	2,329
"                      "                      Treated	306
Business Premises Treated (Costs recoverable)	17

Table 37      RODENT CONTROL - Sower Section

Total Manholes Baited	182	161

Complaints of Infestations received and attended to during the year.... 252

Table 38      MOSQUITO CONTROL

Regular spraying of breeding places was continued during the spring and summer and did much to lessen the nuisance.

Breeding grounds on private premises are not under our control but the public is warned of the importance of giving proper attention to these sources of mosquitoes.

Table 38      MOSQUITO CONTROL (Contd.)

The cost for wages, material and transport was £346 : 11 : 7d for the year ending December 1954.

Arrangements were made with the A.D.A.H. Southern Command, for mosquito control by Army Sanitary Squads on the Browdown Marshes and adjoining land occupied by the War Department. The filling in by household refuse of marshy land at Haslar Golf Links and now in progress on the Browdown Marshes should help considerably in mosquito control by cutting down their breeding grounds. The filling in of all such land should be encouraged as it is the best way to suppress mosquitoes.

Table 39      PUBLIC CONVENIENCES

These are administered by the Public Health Department. There is a special Sub-Committee. There are 15 Conveniences in the Borough.

Table 40      FACTORIES ACTS 1937 and 1948

INSPECTION AND SUPERVISION OF FOOD

Table 47

MILK SAMPLING

Testing to note compliance with the  
Milk (Special Designations) (Raw Milk) Regulations 1949  
and  
Milk (Special Designations) (Pasteurised and Sterilised Milk) Regulations 1949  
was carried out with the following results:-

Class of Milk	Number of Samples Examined	Tests	Number of Samples	
			Passed	Failed
Pasteurised	99	Phosphatase	97	2
		Methylene Blue	97	2
T.T. Pasteurised	25	Phosphatase	24	(1 Test void)
		Methylene Blue	24	1

The Phosphatase Test is for adequacy of heat-treatment and the  
Methylene Blue Test for keeping quality and bacterial count.

Table 48

TESTING OF MILK BOTTLES

38 sample milk bottles were submitted for tests of sterility.  
30 of the bottles were satisfactory and 8 were unsatisfactory

Table 49

TESTING OF CLEANSING FLUIDS (MILK CONTROL)

9 samples of fluid used for cleansing of milk bottles, utensils etc,  
were submitted for examination and all were satisfactory

Appropriate action was taken on all unsatisfactory reports.

	80%	" " " " " Grades 1 or 2
not more than	20%	" " " " " Grade 3
and no		" " " " " Grade 4

In addition, 36 Iced Lolly Samples were examined and all except one were satisfactory.

In all cases of unsatisfactory reports the manufacturer and retailer were advised verbally and by circular letter re precautions to be taken to prevent contamination.

# SECTION G

## GENERAL PROVISION

of

## HEALTH SERVICES for the AREA

Table 57      LABORATORY FACILITIES

Public Health Laboratory Service,  
Central Laboratory, Milton Road, Portsmouth (Port. 74785)  
Public Analyst's Laboratory,  
Trafalgar Place, Clive Road, Portsmouth (Port. 5482)

Table 58      AMBULANCE FACILITIES

The Ambulance Station in the Borough is situated in Privett Road and is one of the five stations (Fareham, Gosport, Havant, Hedge End, Petersfield) in the South-Eastern Division of the County Ambulance Service. The work of these Stations is co-ordinated at the Main Station at Fareham and it is there that all calls for ambulances are received. Written requests for transport should be sent to the County Ambulance Station, The Tannery, North Wallington, Fareham, and verbal requests telephoned to Fareham 2170.

The Local Health Authority is not under obligation to make arrangements for the conveyance of all persons suffering from illness but only of those for whom special transport such as the Ambulance Service provides is necessary. Under normal circumstances, therefore, transport can be provided only on the authority of a doctor but in an emergency an ambulance can be obtained by anyone using the "999" system provided by the Post Office telephone service.

Table 59      NURSING in the HOME

Nurses and Midwives, unless out on urgent cases, can normally be reached at their own homes before 9 a.m., between 1.0 and 2.0 p.m. and in the evening.

### District Nurses

Miss D. Barnsbury,	39, The Croft, Stubbington.	(Stubb. 295)

Miss R. Topley,	1, James Close, Bridgemary	(Fareham 3237)

Table 60      HOME HELP SERVICE

The County Council has established a Home Help Service to give help to households where owing to sickness, pregnancy, lying-in, old age or other reason such help is necessary and cannot be obtained otherwise. Charges are made in accordance with the domestic circumstances. A leaflet on the service giving full particulars is obtainable from,

The local Home Help Organiser,  
Mrs. D. Moore, 145, High St. Gosport (Tel. Gos. 89131)

Table 61      MATERNITY and CHILD WELFARE CLASSES, CLINICS and CENTRES

- (a) ANTE-NATAL RELAZATION CLASSES are held at the Blake Maternity Home on Monday afternoons. The instruction is given by the County Midwives.
- (b) ANTE-NATAL CLINICS are held at the Blake Maternity Home on Thursday at 2p.m.
- (c) CHILD WELFARE CENTRES are held as under:-

<u>ELSON</u>	St.Thomas's Church Hall, Elson Road ( Blake Maternity Home from Oct. 1955)	Every Tuesday 2 p.m.

Table 62      COUNTY COUNCIL SPECIAL CLINICS      The following Clinics are held at "The Gables"  
Spring Garden Lane (Tel Gosp.8032)

(a) CHILD GUIDANCE CLINIC

Dr. L. Rosenberg, Psychiatrist, holds a clinic every Wednesday, all day.  
Psychologist attends every Thursday, all day.  
Psychiatric Social Worker attends both clinics.  
Children are seen by appointment only.

(b) MINOR ORTHOPAEDIC CLINIC

This is attended by Dr. P.V. Pritchard every second Tuesday in the month in the mornings.  
Cases are seen by appointment only.

(c) SPEECH CLINIC

Attended by Miss K.H.L.Dickson, L.C.S.T.  
For treatment of speech disorders in children under school age and children attending maintained schools.  
Patients are seen, by appointment only, Mondays and Fridays all day.

Table 63      SCHOOL and MINOR AILMENTS CLINIC

This Clinic is held at the Divisional Health Office, 2, Stoke Road, (TelGosp.89131)  
It is open daily, except Saturdays, at 9-30 a.m.  
It is attended by Dr. P.V.Pritchard, The Divisional School Medical Officer.  
Children are referred to it for treatment of minor ailments and injuries, for special medical examinations and supervision, and immunisation.  
It is also used by parents, teachers and doctors for consultations with the Medical Officer.  
Adults are also examined for superannuation and such like purposes.  
The County Audiometrician attends every second Wednesday afternoon in the month to test children only by appointment with the gramophone audiometer. These are cases referred to this Clinic because they have, or are suspected to have, defective hearing.

Table 64      DENTAL CLINIC

This clinic is held at the Divisional Health Office, 2, Stoke Road, (Tel Gosport 89131)  
It is open daily and alternate Saturday mornings.

It is attended by one Full-time Dental Officer - Surg. Rear-Admiral (D)  
F.R.P. Williams C.B.E. and two part-time Dental Officers- Mr. F.A. Penney and  
Mr. W.J.A. Reed.

The whole of the Gosport area, with the exception of the two Holbrook  
Schools, the two Bridgemoor Schools and the Woodcot Primary School, is now  
covered for routine inspection and treatment.

Emergency treatment for the relief of pain is available for children  
attending the Schools in the "uncovered" area, and a clinic for such treatment  
is held on Tuesday mornings.

On reference to the County Medical Officer by the Doctor booked or by  
a doctor in charge of an ante-natal clinic, any expectant or nursing mother can  
obtain any necessary dental treatment, including dentures, free.

Table 65      HOSPITAL BOARD SPECIAL CLINICS      The following clinics for our children  
are held at "The Gables", Spring Garden Lane by arrangement with  
the Regional Hospital Board:-

(a) MAJOR ORTHOPAEDIC CLINIC

Surgeon's Day      3rd Tuesday morning in the odd months of year.  
Remedial Day      every Friday, all day.

Table 69      DAY NURSERY Podd's House, 185, Brockhurst Road, Gosport (Tel.Gosport 89508)

Accommodates 70 children between the ages of 0 and 5 years.

A priority System is in operation in regard to admission to County Council Day Nurseries, and the Priority Cases are as follows:-

- (a) Children whose mothers are obliged to work as sole or main supporter of the family, i.e. unmarried mothers and widows, or cases where the husband is unable to follow full-time employment on account of ill-health.
- (b) Children whose mothers are ill or are unable, for some reason, to care for them themselves.
- (c) Cases of overcrowded or unsuitable home conditions, where it is necessary in the interests of the child on health grounds.

Children not coming within the above categories are admitted on the understanding that if the vacancy should be required for a priority case, the child will be withdrawn.

Table 70      OCCUPATION CENTRE FACILITIES St. Faith's Institute, Loesland Road, Gosport

Children if suitable for admission are admitted from Gosport, Fareham, Shedfield, Swanmore and Wickham. Also from any place within reasonable distance having regard to transport facilities and age and ability of defective.

Table 71      VACCINATION Against SMALLPOX

This is normally carried out by the family doctor.

From September 1955, Medical officers attached to Child Welfare Centres will also carry out this service on request.

Table 72      IMMUNISATION against DIPHTHERIA and WHOOPING COUGH

For 1954 the Official Scheme only covered action for Diphtheria.

From the 9th May 1955, both diseases have been included.

Parents have a choice of attention by the family doctor, the Medical Officer at the Child Welfare Centre or Nursery or at the School Clinic, Stoke Road.

Table 73      REMOVAL of PERSONS in NEED of CARE and ATTENTION

This is a Borough responsibility under Section 47 of the National Assistance Act 1948 and National Assistance (Amendment) Act 1951.

Successful applications were made for two Court Orders and the usual and subsequent quarterly Renewals. These Orders were in respect of two infirm females who were unable to make suitable arrangements for their own care in their own homes. They were sent to an institution which specifically cares for such cases
